2020/21 OPERATING PLAN INYO NATIONAL FOREST

MAMMOTH LAKES SNOW STORAGE PIT OPERATION PLAN

LOCATION

The pit is located on the North side of 203 between Meridian Blvd and the USFS Welcome Center.

OVERVIEW

The proposed guidelines are for the operation and maintenance of the Mammoth Lakes snow pit. The pit will be used to store snow during large snow seasons when the Town has run out of storage space on Town owned [properties and privately-owned lots. Due to the lack of available Town Staff the Town of Mammoth Lakes will oversee and manage a private contractor for all snow operations and maintenance on the site. The area of permitted use shall be staked and flagged prior to use.

PURPOSE

The purpose of the proposed action is to:

1. Reduce the buildup of snow throughout the Town of Mammoth Lakes during heavy snow seasons.
2. Operate and maintain the snow storage pit to best utilize the space, keep the land clear of trash and other debris, prevent potentially harmful substances from being placed on the property, and maintaining safe working conditions and a safe environment for the public.
3. The operations plan sets forth procedures to maintain the snow storage pit area, as well as the helipad access road and gate.

PLAN SPECIFICS

Site Access

- The use and control of the road and gate shall be as follows
 1. There shall be a padlock for the Town of Mammoth Lakes and a padlock for the U.S Forest Service daisy chained together on the security chain allowing access for each agency.
 2. The gate shall remain locked at all times when operations are in progress allowing for public pedestrian access to the area. Public vehicles shall not be allowed access and will be required to park off to the side outside the gated area.
 3. When snow operations are in progress the gate shall be open with a full time monitor on duty until the operation is completed and the gate closed and locked. During the operation the area shall be closed to the general public due to the hazardous conditions caused by large haul trucks and snow moving equipment. The monitor will also count loads and observe each load to make sure no unauthorized bed liner release agent, such as diesel or other petroleum product, is being used. If detected the monitor shall reject the load and document the operator and truck and the time it was rejected. The monitor will be responsible for reporting violations directly to the Town Public Works or Police Department.
- The permittee shall maintain the access road to a standard which will allow trucks moving in opposite directions sufficient room to pass.

Snow Storage

- The permittee's contractor shall store the snow in a such a manner as to avoid burying or compacting snow around trees.
- The permittee's private contractor shall report any and all misuses of unauthorized release agents to the Town of Mammoth Lakes Agent. The report will be copied to the Forest Officer in charge of the permit.
- Prior to operations the contractor shall mark the limits of the site as shown in Attachment A

Maintenance

- The Town of Mammoth Lakes shall provide maintenance so that at the termination of this permit, the road will be in condition equal to that normally on road as of like standard, and unless otherwise agreed to, leadoff drainage and water barriers to prevent erosion will be constructed on the road as directed by the Forest Officer in charge of the permit.
- The site shall be cleaned bi-weekly once regular snow melt occurs, typically in late April or May.
- Post snowmelt clean-up shall be done to the satisfaction of the Forest Officer in charge of the permit including but not limited to the collection and proper disposal of all trash and debris in with the snow. The Contractor shall sweep debris from the helipad.
- Town Staff will monitor runoff from the site during any warm periods which cause streams of running water and in the spring when the main snow melt runoff starts. Should runoff from snowmelt at the site have as adverse effect on Murphy Gulch and Mammoth Creek, the permittee may be required to construct a sedimentation facility to treat runoff, and place BMP's as directed by Town.

Snow Stakes

- The Town will set snow stakes along the haul route and remove them during the summer.

Signage

- The permittee shall provide Forest Service approved signage during the winter months during snow storage operations in order to provide additional information to truckers and recreational users. The permittee will remove the signage during nonoperation times and during summer months. The Town proposes to MUTCD standard signs as appropriate.
