-
- 1. Winter Grooming Updates
 - 2. Reds Meadow Road Construction Update
 - 3. PCT Route Update
 - 4. SHARP Update
 - 5. Mammoth Creek TMDL Owned Parcel Rec Plan
 - 6. Sign Replacement
 - 7. TMDL Digital Asset Management

5

-
- MM&A rented us a SkiDoo Expedition snowmobile to tow our Trid-Tech Grooming Implements.
 - It has worked very well for our purposes.
 - We have been able to trailer it back and forth from slushy road to machines with ease.

6

-
- We started us with 3 grooming staff this year.
 - It's allowed us to groom at a good frequency maintaining a high level of service across both halves.

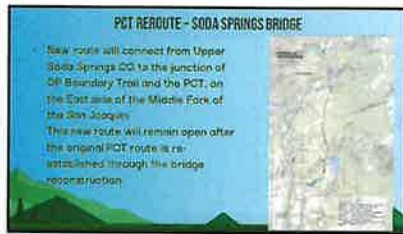

7

-
- Road will be closed from Minnerb to Agnew Meadows Monday - Thursday, June 7-Sept 15.
 - Information and Map shared with the public during Community Coffee on March 7 by USFS.
 - <https://www.fs.usda.gov/detail/inyo/alerts-notices/70dd4epprd1127643>

8

-
- Bridge over the Middle Fork of the San Joaquin near Soda Springs CO was destroyed during winter 22/23.
 - Bridge replacement will likely take several years and a reroute is necessary to keep foot traffic off of the road.
 - Coordination of existing trails/decommissioned trails and new

5.3 TSMP ANALYSIS

- 13 years old
- Revised efforts to date to track accomplishments of recommended actions
- We are in the process of generating an up to date list of accomplishments
- We believe that it is time to conduct a full update of TSMP

Form of statement Letter Trail System Master Plan

5.3 TSMP ANALYSIS

21

6.2 RECOMMENDATION NON-MOTORIZED GROOMING EQUIPMENT

22

6.2 RECOMMENDATION NON-MOTORIZED GROOMING EQUIPMENT

We are planning to purchase our own utility sled.

- Industry standard for this type of product is the SKIDoo
- Swedish
- Approx. \$20K

23

6.2 RECOMMENDATION NON-MOTORIZED GROOMING EQUIPMENT

Used Tucker 2000EXL available from MOWD (\$70K)

- Considered Tucker to get a quote for additional grooming attachments - this machine is too small to operate a tiller
- Shall could propose utility to sustain trail grooming program

24

6.2 RECOMMENDATION NON-MOTORIZED GROOMING EQUIPMENT

- Pash Bully 400 - Available from MMSA (Heavily Used)
- Old skid groom with Clifford out at Shady Rest
- Machine is 17' wide
- Too large for our application

25

6.3 PURSUE INCLUSION OF MINARET VISTA TRAIL TO USFS TRAIL SYSTEM

1.5 mile trail - very well used and established, follows sustainable design principles.

- Sign and for all intents and purposes open to public
- We would like to pursue adding this trail to the USFS system/MLTS
